OBJECTIVE

I am Software Engineer with 7 years of experience in Angular Application Development using Angular technologies and node.js. Presently associated with MediTree Healthcare pvt. As a Senior Software Engineer. Verifiable experience in developing applications under Help desk, Healthcare Domain, Pre-recruitment Assessment, and Retail Industries. A good exposure in the end-to-end development of software products from system study to designing, coding, testing, de-bugging, documentation. A skilled communicator with strong interpersonal and relationship management skill.

EDUCATION

B.TECH, Computer Science	2014-2018
Gyan Sagar College Of engineering	
Higher Secondary Certificate(XII), Science-Mathematics	2011-2012
Takshishila H.S. School khurai, Sagar	
Secondary School Certificate(X)	2013-2014
Govt. Modal H S School ,khurai	

SKILLS

Front-End	ReactJS, angularJS , Angular Material, nextJS, Javascript,ES6
Back-End	NodeJS, ExpressJS,FastAPI
Database	MongoDB, MySQL, PostgreSQL
Version Control	Git, GitHub
Deployment or Testing	VPS , Render, Vercel, AWS, Postman
Soft Skills	Adaptability, Client Communication, Requirement Analysis

EXPERIENCE

Software Engineer	<i>2022-current</i>
MediTree Healthcare	

- Developed full-stack features using React.js, Angular, and Node.js with MySQL for database management.
- Published app on Google Play Store & App Store, managing the entire deployment pipeline.
- Built modules for authentication, appointment booking, image handling (Multer), and mailer services.
- Collaborated in an agile development environment, enhancing skills in version control, code reviews, and deployment processes using tools like Git, GitHub.

Full Stack Developer	<i>2018-2022</i>
-----------------------------	------------------

Galaxy Script

- Developed expertise in building scalable full-stack applications using modern frameworks and tools, including, ReactJS, and NodeJS.
- Developed and deployed web and mobile applications, showing proficiency in front-end and back-end integration.
- Learned agile workflows and collaborative tools to enhance teamwork and project efficiency in real-world scenarios.

PROJECTS

RFX PNC Application (Buyer-Vendor Management)

- Developed and maintained multiple Angular components, directives, services, and pipes to enhance UI/UX.
- Designed and integrated REST APIs using Node.js for seamless buyer-vendor workflows.
- Contributed to end-to-end design, development, and deployment of the application within a large team.
- Technology Used: Angular 17, Node.js, MS SQL Server, MVC, HTML, CSS3, JavaScript, Google Analytics.

Interface 365 CRM

- It is a customer relationship management platform designed to manage and analyse customer interactions, improve service, and support retention strategies.
- Developed multiple Angular 6 components, directives, services, and pipes to build modular applications. Deployed web applications on Microsoft IIS (Internet Information Server) ensuring production readiness
- Analysed business requirements and implemented scalable portal functionalities as per client needs.
- Technology Used: Angular 17, Node js, MS SQL Server, MVC, HTML, CSS3, JavaScript, Google Analytics.

Office 320

- Analysing Detailed Business Requirements to understand the application. And Developing the Web application portal functionality as desired by client
- Deployed the system on Hostinger VPS, handling both backend services and frontend integration.
- Technology Used: React, Node.js, Express.js, MySQL, FingerprintJS, JWT, IP, Whitelisting, Day.js, VPS, and Hostinger.

E-Lite Hospital Software: web & Mobile app

- Developed a role-based Hospital Admin Panel using Angular with secure auth and access control.
- Deployed the full-stack application on Hostinger VPS (backend) and Hostinger hosting (frontend & database), ensuring scalability and reliability.
- Technology Used: Angular, Node.js (Express), Socket.io, MySQL, phpMyAdmin, Hostinger VPS, FileZilla.

Masala Crunch: web & Mobile app

- Developed a location-based Food Delivery App (Masala Crunch) with Angular frontend and Node.js (Express) backend.
- Deployed the full-stack application on Hostinger VPS (backend) and Hostinger hosting (frontend & database).
- Optimized real-time communication and ensured smooth, scalable performance across modules.
- Technology Used: React native, Angular, Node.js (Express), Socket.io, MySQL, phpMyAdmin, Hostinger VPS.

E-Lite Analysis inventory Software: web & Mobile app

- Analysed business requirements and implemented scalable portal functionalities as per client needs.
- Deployed the full-stack application on Hostinger VPS (backend) and Hostinger hosting (frontend & database), ensuring scalability and reliability.
- Optimized real-time communication and ensured smooth, scalable performance across modules.
- Technology Used: React native, Angular, Node.js (Express), Socket.io, MySQL, phpMyAdmin, Hostinger VPS.
